Introduction

[Nanotech France 2019](#) brings together leading scientists, researchers, engineers, practitioners, technology developers and policy makers in nanotechnology to exchange information on their latest research progress and innovation.

Participants from top international academic, government and private industry labs of different disciplines participate in Nanotech France 2019 to identify new technology trends, development tools, R&D collaborations and commercialization partners. The conference provides an unprecedented opportunity to discover innovation in the area of nanotechnology and new business opportunities. It is among the most important events in terms of international regulatory policies and it is open to the participation of private companies. The conference covers all frontier topics in nanotechnology. The conference includes plenary and keynote lectures, oral presentations, and posters sessions, presented by academicians and industrials. It is an excellent opportunity for students and early carrier researchers to meet and discuss with lead researchers about projects, scholarships and groups collaborations.

The 5th edition of Nanotech France 2019 will be organized jointly to:

- [NanoMatEn 2019](#)
- [NanoMetrology 2019](#)
- [Biotech France 2019](#)

The conferences access is reserved for the registered participants (one registration allows the access to the four conferences). The exhibition access is free of charge and open to the large public.
